

SOFTWARE REQUIREMENT SPECIFICATION (SRS)

Project Name: Readify – Online Book Management System

Version: 1.0

Prepared By: Vasant Karode

Date: 25/10/2025

1. Introduction

1.1 Purpose

The purpose of this document is to describe the functional and non-functional requirements of the Readify application. This document will serve as a reference for development and testing activities.

1.2 Scope

Readify is a JavaFX-based desktop application that allows users to browse, read, and manage digital books. The system provides user authentication, category-based book browsing, PDF viewing, personal library management, and chatbot assistance.

1.3 Definitions

- SRS – Software Requirement Specification
 - UI – User Interface
 - PDF – Portable Document Format
 - RTM – Requirement Traceability Matrix
-

2. Overall Description

2.1 Product Perspective

Readify is a standalone desktop application built using JavaFX with Firebase as backend for authentication and data storage.

2.2 User Classes

- Registered User

- Admin (if applicable)
-

2.3 Operating Environment

- OS: Windows 10 or above
 - Platform: JavaFX Desktop Application
 - Backend: Firebase
-

3. Functional Requirements

3.1 Authentication Module

FR-01: User Registration

The system shall allow new users to register using email and password.

FR-02: User Login

The system shall allow registered users to log in using valid credentials.

FR-03: Logout

The system shall allow users to log out and terminate the session.

FR-04: Input Validation

The system shall validate email format and password strength.

3.2 Dashboard Module

FR-05: Dashboard Display

The system shall display categories and recommended books after login.

FR-06: Search Functionality

The system shall allow users to search books by title.

3.3 Category Module

FR-07: Category Selection

The system shall display books based on selected category.

FR-08: Empty Category Handling

The system shall show message if no books available in selected category.

3.4 Book Listing Module

FR-09: Display Book Details

The system shall display book title, description, and category.

FR-10: Add to Library

The system shall allow users to add books to My Library.

FR-11: Prevent Duplicate Addition

The system shall prevent duplicate books in library.

3.5 PDF Viewer Module

FR-12: Open PDF

The system shall allow users to read selected book in PDF format.

FR-13: Error Handling

The system shall show error message for invalid PDF link.

3.6 My Library Module

FR-14: View Saved Books

The system shall display all books added to user library.

FR-15: Remove Book

The system shall allow users to remove books from library.

3.7 Chatbot Module

FR-16: Chat Interface

The system shall provide chatbot interface for user queries.

FR-17: Response Generation

The system shall generate responses for valid user inputs.

4. Non-Functional Requirements

4.1 Performance

- Application should load within 5 seconds.
 - PDF should load within acceptable time ($\leq 3-5$ seconds).
-

4.2 Security

- User credentials must be securely stored.
 - Unauthorized users must not access dashboard.
-

4.3 Usability

- Application should have user-friendly interface.
 - Buttons and navigation should be clear and accessible.
-

4.4 Reliability

- System should not crash during normal usage.
 - Proper error messages should be displayed.
-

5. Assumptions and Dependencies

- Internet connection required for Firebase authentication.
 - PDF files must be available and accessible.
-

6. Future Enhancements

- Admin Panel
 - Payment integration
 - Dark mode feature
-

7. Conclusion

This SRS document defines the requirements for the Readify application. All development and testing activities should align with these requirements.
